Average River herring and Shad catch during winter 2013 fishery
1/2/13 to 4/5/13

Low (average less than 1.5% River Herring and Shad bycatch)

Moderate (average between 1.5% and 5%)

High (average above 5%)

Important Notes

River herring and shad catch amounts are generated from portside and at sea observations of vessels targeting Atlanic herring or mackerel and offloading in Rhode Island

Grid lines follow 5' longitude and 2.5' latitude lines

Combine the row letter and column number to get the cell name

The number inside a cell is the number of trips sampled from that cell

Catch information is trip level, one trip may occur in several cells

Total trips sampled for year:117
