

Jefferson Taylor Turner

Chancellor Professor

Department of Biology/Department of Fisheries Oceanography
School for Marine Science and Technology
University of Massachusetts Dartmouth

Research Interests

Long-term plankton and water-quality ecological survey of Buzzards Bay; plankton communities of Boston Harbor and adjacent waters; zooplankton feeding; food web accumulation and transport of red tide toxins; interactions between copepod feeding and reproductive success.

Current Research

2006-2012: Grant from ECOHAB (NOAA/NSF partnership). GOMTOX: Dynamics of *Alexandrium fundyense* distributions in the Gulf of Maine: An observational and modeling study of nearshore and offshore shellfish toxicity, vertical toxin flux, and bloom dynamics in a complex shelf sea. (Turner-UMass Dartmouth portion \$523,260), D.M. Anderson (PI, WHOI) and 15 Co-PIs.
